

Over time, MCMS will contain a storehouse of information about your business. With MCMS Executive Analysis tools, you can use that information to better manage your company and make decisions. These tools help you see when business performance changes or opportunities arise, and they give you the ability to take immediate action knowing the most current details. Today's business world changes too quickly for you to wait for scheduled reports that you have to pour through to know what's happening in your company. Now you can make decisions in real time using up-to-the-minute information. These tools can provide you with just the edge you need stay ahead of your competitors.

MC Dashboard provides you with graphical objects such as meters, gauges, tables, graphs and scales that monitor key performance indicators within your company. You can monitor sales, profits, inventory, accounts receivable, backlog, etc., as they change. Then, if they indicate a problem or opportunity, you can drill down to see more and more detail as needed.

Sample Graphics

MC Alert monitors key business conditions and generates an e-mail notification when a specific condition (an "Alert") is met. The module includes a standard set of "Alerts", and Compusource can create custom alerts if requested. MC Alert runs unattended, reviewing your company's data and sending notifications whenever action needs to be taken.

Sample Alerts

- Sales Orders not shipped for X days
- Quotes that are X days old
- Average Profit Margin below X percent
- Customers who have not purchased in X days
